

IMC Club - New York Chapter Meeting

This workshop addresses an in-flight situation that intimidates novice and experienced pilots alike - losing critical instruments while in Instrument Meteorological Conditions (IMC)! During this workshop we'll present a scenario that focuses on a vacuum failure that leads to an emergency diversion and partial panel approach. While many pilots fly airplanes equipped with glass cockpit or redundant systems, the process of managing emergency situations is universal. This workshop provides you with an opportunity to determine how you would handle any emergency that requires an immediate diversion in IMC. Click on the link below and register TODAY!

Directions: Republic Airport is located off Route 110 near the Control Tower that is easily accessible from the Southern and Northern State Parkways and the LIE.

A message from the National FAASafety Team Manager

Invite a fellow pilot to the next WINGS Safety Seminar in your area.

Sign up for the FAA's safety services at www.FAASafety.gov!
